Notable Projects

BreatheWell | Mobile App | Python, Kivy

- Developed and Peer Programmed object-oriented Android app for stress management in collaboration with a graduate nursing student.
- Followed the full software development lifecycle: requirements gathering, design documentation, implementation, testing, and final deployment.
- Created comprehensive user and technical documentation to support app maintenance and future enhancements.

The Cinematic | Full Stack – Web Application | Python, Django, JS, HTML/CSS, SQLite

- Designed and developed a full-stack movie review web application supporting user accounts, dynamic ratings, and persistent data storage.
- Implemented backend functionality using Django for routing, database modeling, authentication, and form handling, with a responsive front-end built in HTML, CSS, and JavaScript.
- Integrated client-side interactivity including star-based rating systems and dynamic content updates.
- Followed a complete development lifecycle including planning, implementation, debugging, testing, and deployment.

New Rally-X | Game Development | Python, Pygame

- Recreated a classic arcade game using object-oriented programming principles and the PyGame library.
- Completed end-to-end development lifecycle including requirement analysis, design specification, implementation, testing, and project documentation.
- Implemented collision detection, enemy AI, dynamic scoring, and HUD for an engaging player experience.
- Conducted internal **QA testing** and iterative debugging to ensure a smooth player experience.

Technical Skills

- **Languages:** Python, Java, C++, Dart, Flutter
- **Frameworks/Libraries:** Django, Pygame, Kivy, SFML, Pandas, Numpy
- **Web & Databases:** JavaScript, HTML, SQL, Access
- **Tools & Systems:** Git/Github, Linux, Agile/Scrum

Education

<u>Clemson University</u> M.S. in Computer Science (In Progress) Concentration: Software Engineering Projected December 2026	<u>Gardner-Webb University</u> B.S. in Computer Science (GPA: 3.90) Concentrations: Pure Computer Science and Programming May 2025
Relevant Coursework: • Software Engineering, Data Structures and Algorithm Analysis, Artificial Intelligence, Machine Learning, Programming in Java, Programming in C++, Survey of Programming Languages, Database Management, Operating Systems, Data Communications and Networking	

Work Experience

Golf Sales Associate | Dick's Sporting Goods | Fall 2025-Present

- Provided customer service and technical product support in a high-volume retail environment, assisting customers with product selection, troubleshooting, and purchase decisions.
- Maintained detailed product knowledge across golf equipment and accessories to improve customer satisfaction, sales performance, and inventory accuracy.
- Processed transactions, handled point-of-sale systems, and supported merchandising and inventory management.

Program Lead | Camp Lurecrest | Fall 2025-Present

- Led program operations including scheduling, activity planning, risk management, and safety compliance for youth programs.
- Supervised staff and participants while maintaining clear communication with parents, administrators, and team members.
- Resolved conflicts, managed logistics, and ensured smooth daily operations.

Peer Tutor | Gardner-Webb University | Spring 2025

- Delivered academic support for students in computer science courses, including programming, algorithms, data structures, and problem-solving.
- Provided one-on-one and group instruction, improving student performance through personalized learning strategies.
- Strengthened technical communication and analytical skills in an educational environment.

Head Lifeguard and Instructor | Upper Palmetto YMCA | 2022-2024

- Supervised and trained a team of 20+ employees in compliance with safety regulations and emergency response protocols.
- Conducted lifeguard certification courses and operational training programs.
- Managed scheduling and conflict resolution in a high-responsibility environment.

Extracurricular Activities

Disc Golf Club | Gardner-Webb University | President

- Managed budgeting and financial planning, increased membership through outreach initiatives, and organized regional competitions and events.
- Coordinated logistics, scheduling, and stakeholder communication.

Inter-Club Council | Gardner-Webb University | President

- Coordinated 20+ student organizations and worked with administration to improve club policies.
